Projects

Chatbot	Feb. 2025 - Apr. 2025

Personal, Online

The web app allows users to register and login, enabling them to have full conversations with a chatbot powered by Generative AI. Built to provide an interactive and seamless user experience, the app leverages advanced AI models for natural, engaging dialogues.

Multiplayer Pong Game	Jun. 2024 - Nov. 2024

1337 Coding School, Tetouan

Designed and developed a web application where users can register/login to play Ping Pong and chat with other users in real time. Integrated an AI module to enable users to play against the computer.

Dockerized Web Application	Apr. 2024 - Jun. 2024

1337 Coding School, Tetouan

Developed a containerized application using Docker and Docker Compose, integrating a WordPress site with PHP-FPM, Nginx, and MariaDB to ensure scalable and efficient deployment.

Web Server	Jan. 2024 - Apr. 2024

1337 Coding School, Tetouan

Contributed to a group project to build a simple HTTP/1.1 web server in C++, handling requests, responses, and basic CGI execution, demonstrating networking and protocol implementation.

Certificates

EF SET English Certificate	Nov. 2024

EF Set, Online

Certified for completing the EF SET English test, showcasing advanced abilities in reading and listening comprehension. Reflects a detailed assessment of English language proficiency in key areas.

Mathematics Certificate	Nov. 2024

365datascience, Online

Acknowledged for proficiency in linear algebra, covering fundamental concepts and operations. Highlights its practical use in data analytics, data science, and AI.

Diploma in French Language Studies (DELF B2)	Jan. 2021

Institut Français du Maroc, El Jadida

Recognized for achieving intermediate proficiency in French, as demonstrated by the DELF B2 exam. Demonstrates effective communication skills in both spoken and written French across various contexts.

Education

IT Architect Student	Since Sept. 2022

1337 Coding School, Tetouan

Specialized training in software development and computer programming with a focus on project-based learning and peer-to-peer education.

Baccalaureate in Mathematical Sciences A	July 2021

Groupe Scolaire Ilyass, El Jadida

Specialized high school diploma with an emphasis on advanced mathematics, physics, and analytical problem-solving.
